---

## SUMMARY

Motivated computer science student seeking a role in website development, graphic design, and social media marketing. Eager to apply knowledge, gain experience, and contribute innovative digital solutions. Committed to learning new technologies to create high-quality websites and engaging content.

---

## PROJECTS

### Fencing E-Commerce Solution

- Built a responsive e-commerce website for a fencing company using React and MUI.
- Developed an interactive product display and client-side quote calculator.
- Added customer testimonial carousel and lead generation form.
- Optimized performance with React Intersection Observer and smooth UI animations.

### Appliances – Modern Product Showcase

- Designed and developed a responsive React frontend for an appliance brand using Material-UI and custom CSS styling.
- Integrated multiple dynamic carousels and an explore section to display product categories interactively.
- Built reusable components (Navbar, Footer, Carousels, Explore) for scalability and cleaner code structure.
- Optimized UI responsiveness and performance using React hooks and best practices.

---
